THE APPLICATION

The application seeks the demolition of former bandstand and storage building and the redevelopment of former tennis courts. The proposal consists of the erection of two new public toilet buildings, a community food hub, a community shed, a greenhouse and potting shed/store with associated fencing to contain a community horticultural hub, two curved walls with a canopy above for an entertainment space, a multi-use space for pop-up market stalls/leisure activities and associated on-site car/cycle parking, vehicular and pedestrian access points at North Lodge Park, Overstrand Road, Cromer.

A similar application was previously submitted (Ref. PF/22/3010) and considered at Planning

Committee in June 2023 where some heritage concerns were raised by members and a decision of deferment was reached. The application was subsequently withdrawn and resubmitted as PF/23/1761 with several design alterations. Whilst the premise of the scheme largely remains the same, the main differences since the previous submission are the omission of the Polytunnel in the horticultural hub, this has been replaced with a secure tool store, indoor potting area and greenhouse structure. The food hub, was previously formed from two clad shipping containers, this has been amended to a much smaller timber clad cabin with sedum roof. All the proposed structures will all have vertical timber cladding with sedum roof coverings and the greenhouse area glazed. For the fullness of the report all matters are considered below taking into account these changes.

REASONS FOR REFERRAL TO COMMITTEE:

This application has been referred to the Development Control Committee at the request of the Assistant Director of Planning, having regard to the fact that the previous application for a similar development proposal was before members for consideration in June this year.

PARISH/TOWN COUNCIL:

Cromer Town Council – No response received.

CONSULTATIONS:

NNDC Landscape Officer – **No objection**, subject to the following comments (written comments as per PF/22/3010, with verbal update confirming position as part of current application):

‘The proposed re-use and animation of this redundant area of North Lodge Park is to be welcomed in principle.

The Park is a valued green space within the town and is designated as Open Land Area within the Local Plan. Policy CT 1 Open Space Designations states that ‘development will not be permitted on Open Land Area except where it enhances the open character or recreational use of the land’. The Landscape section considers that the flexible community use proposed and the enhancement of a neglected area of the park would comply with this policy requirement.

The two circular toilet pods are bulky structures that do not make efficient use of space and dominate the whole area, particularly overpowering the covered entertainment space. These could be re-designed to be more unobtrusive and occupy far less space, e.g. tucked in behind the existing hedge.

The community shed is a large structure, but with a sedum roof and timber cladding as proposed, will be relatively well assimilated into the south-east corner amongst mature vegetation. The proposed fencing around the horticultural enclosure is appropriate, as is the proposed timber cladding to the food hub.

The enhanced landscape planting in the form of semi-mature trees with under-planting along the south site boundary with Overstrand Road is appropriate. If there is no revision

forthcoming of the design of toilet pods, then there should be increased landscape planting around the structures to soften their impact in the wider park, especially on the north side of both pods.

Hard and soft landscape proposals and external lighting details should all be secured by condition.'

Norfolk County Council (Highways) – **No objection**, comments resubmitted from application PF/22/3010 (which remain relevant):

Initial concerns that the proposed uses would engender an increased use of the narrow, historic, gated access to 'Carriage Drive' which has restricted width, a very tight turning radii and it would be shared with pedestrians who regularly and predominantly use this route.

Increased vehicle movements increases the likelihood of:

- kerb/footpath overrun,
- the risk of conflicts with pedestrians and/or other vehicles within the narrow access,
- vehicles stopping, waiting or reversing onto the C634 Overstrand Road which affects the free flow of traffic and highway safety

The revised proposal to only permit a maximum vehicle size on the site for the pop up markets, are at a scale which could fall under permitted development (28 days) and would also be limited under the terms of the Market; permitting only relevant vehicles at specified times and marshalling this access would significantly reduce any potential impacts.

Subject to adequate management of the above, I would find an objections difficult to substantiate.

NNDC Conservation and Design Officer – **Advice:**

'When judged against the previously submitted scheme, Conservation & Design can broadly welcome;

- I. The reduced size of the community container;
- II. The removal of the polytunnel;
- III. The principle of replacing it with a bespoke designed greenhouse, and
- IV. The greater consistency which would stem from using the same vertical boarding throughout.

At the same time, however, the new larger greenhouse would in practice exacerbate the relatively high concentration of structures previously identified. In addition, despite the cladding having been re-orientated, there are still outstanding concerns about the appropriateness of having utilitarian-looking buildings in such a sensitive setting (i.e. the community shed and portakabin hub).

As a result, it remains the case that harm would be caused to the appearance and character of the park, and thus to the setting of the Grade II listed North Lodge Building, and to the overall significance of the Cromer Conservation Area.

In terms of quantifying the level of this harm, clearly the magnitude has been further reduced through the changes made. Therefore, whilst it must still be regarded as 'less than substantial' for NPPF purposes, it has unquestionably been lessened on this spectrum. As we know, however, great weight must still be given to the conservation of heritage assets irrespective of the level of harm. Therefore, due consideration still needs to be given to the balancing exercise

required under para 202 of this document. However, with the scheme potentially offering a persuasive package of public benefits, it would be understandable if the residual heritage harm were to be set aside in this case.'

Economic Growth Team – **Support Application**, subject to the following comments:

'In consideration of PF/22/1761 the Economic Growth Team supports this application. It is recognised that there are potential economic benefits that would be derived by such a proposal such as supporting local businesses and community groups.

It is also recognised that it would provide an additional draw to the eastern end of Cromer, boosting footfall for businesses located on Church Street.'

REPRESENTATIONS:

Three in **objection** and summarised as follows:

Highways

- Increased vehicle movements within the park.
- There must be adequate separation of pedestrians and vehicles.
- All non-essential vehicle entries and exits to North Lodge Park should be prohibited.
- A new pedestrian access across the Carriage Drive, will create two blind access points from behind hedges. This increases the danger, especially to children.
- No account is taken of the number of vehicles that already routinely access North Lodge Park.
- This proposal introduces parking by stealth to North Lodge Park.
- 11 parking spaces are described however there are many more vehicles already using this area, and the entirety of the park.
- A parking warden or camera enforcement and formal parking penalties should be enforced for the entire North Lodge Park. This is the only vehicle deterrent that will ensure traffic safety for park users.

Design/ Heritage Impact

- The toilet and changing spaces pods are of poor design.
- The design of the toilets will encourage vandalism.
- These new toilets with their flat Perspex roofs will be costly to maintain and are potentially an eye-sore.
- The two toilet blocks will do nothing to preserve or enhance the character of North Lodge Park.
- The conservation report concluded the public benefit may outweigh this harm, but no attempt has been made to measure, quantify and justify the public benefit save that the applicant states it exists.
- The previous application was refused because the harm it would cause to Heritage Assets outweighed the benefits. This application is not materially different.
- No intention to resurface the area.

Landscape

- The applicant should seek to improve the quality of the proposal rather than camouflage unsightly inappropriate structures with plants and bushes.
- The previous application that this one replaces included the same landscape proposals. The previous application was refused.

Intended use

- The proposal would develop this 'Open Space' with activities some of which have limited or no recreational or sport benefit (for example, the food hub).
- The proposed development does not follow the guidelines in dealing with land with an "Open Space" designation
- Authorities are required to evaluate public benefit before developing 'Open Space'. No attempt has been made to do this, it is simply accepted that there will be a benefit because the applicant says so.
- The Portakabin proposed to provide the 'food hub' is similar in appearance to previously refused shipping containers. Whilst their use may be temporary but the structures are likely to remain for decades.
- These temporary structures are also relatively expensive and therefore unlikely to be removed quickly or easily.
- Security fences will also restrict access to the 'Open Space' limiting its benefit to a select few, rather than the whole of the community.

HUMAN RIGHTS IMPLICATIONS

It is considered that the proposed development may raise issues relevant to Article 8: The Right to respect for private and family life.

Article 1 of the First Protocol: The right to peaceful enjoyment of possessions.

Having considered the likely impact on an individual's Human Rights, and the general interest of the public, approval of this application as recommended is considered to be justified, proportionate and in accordance with planning law.

CRIME AND DISORDER ACT 1998 - SECTION 17

The application raises no significant crime and disorder issues.

LOCAL FINANCE CONSIDERATIONS

Under Section 70(2) of the Town and Country Planning Act 1990 the council is required when determining planning applications to have regard to any local finance considerations, so far as material to the application. Local finance considerations are not considered to be material to this case.

OFFICER ASSESSMENT:

MAIN ISSUES FOR CONSIDERATION:

- 1. Principle and Site History**
- 2. Design and Heritage Impacts**
- 3. Landscape and Visual Impacts**
- 4. Residential Amenity**
- 5. Highway Safety**

1. Principle and Site History

The application seeks to redevelop the disused former tennis courts and bandstand area in North Lodge Park, with two new public toilets, a community shed, a greenhouse, potting shed and secure store with associated fencing, a canopied entertainment space, community food-hub, a multi-use space and associated on-site car/cycle parking, vehicular and pedestrian access points.

The site lies within the settlement boundary of Cromer, which is designated as a 'Principal Settlement' by Policy SS 1 and SS 7 of the Adopted North Norfolk Core Strategy where development is supported in principle subject to compliance with all relevant core strategy policies.

North Lodge Park is located to the eastern end of Cromer town centre and is designated as

Open Space and Public Realm. Core Strategy Policy CT 1 requires that development will not be permitted in Open Space designations except where it enhances the open character or recreational use of the land. Similarly, Policy EN 5 states that within areas designated as Public Realm proposals will be expected to enhance the overall appearance and usability of the area. Whilst the proposals would not be considered to contribute to the open character of the park, given the built form proposed. The proposals would introduce a number of recreational uses to the land, such as community gardening and outdoor entertainment including those which have been identified as being of interest locally, would serve a number of different community groups and be of interest to a number of demographics. Larger, better quality tennis facilities are provided within Cromer at the Lawn Tennis & Squash Club leaving the former courts at the North Lodge largely redundant for tennis/sports purposes for a significant number of years.

Given the dilapidated appearance of the former tennis courts and bandstand building, which have stood unused for a significant time, the proposal to upgrade and bring the area back into active recreational use would be considered to enhance the sites appearance and revitalise this underutilised part of the park. Consequently, it is considered that the proposals would comply with Policies CT 1 and EN 5 in that the development would enhance the recreational use, overall appearance and usability of the land.

Policy CT 3 provides support for new or improved community facilities within Principle and Secondary Settlements. Cromer is a Principal Settlement with parks being an important local facility. The proposed redevelopment and improvements to the former tennis courts are therefore also supported by this policy in principle.

2. Design and Heritage Impacts

Section 72 of the Planning (Listed Buildings and Conservation Areas Act) 1990 (LBCA) states that with respect to any buildings or other land within a conservation area, in the exercise of relevant functions under the Planning Acts, special attention shall be paid to the desirability of preserving or enhancing the character or appearance of that area. In this instance the whole site falls within the Cromer Conservation Area and as such the statutory duty imposed by Section 72 is engaged. Section 66 of the Planning (Listed Buildings and Conservation Areas) Act 1990 (LBCA) places a duty on Local Planning Authorities to have special regard to the desirability of preserving a Listed Building, or its setting, or any features of special architectural or historic interest it possesses. This application site falls within the '*setting*' of a number of Listed Buildings.

A site layout plan has been provided in support of the application, along with elevations and visualisations which give an idea of some of the potential uses for the multi-use area. The proposal is made up of several different elements.

Public Toilets

Two new public toilets are proposed as part of the redevelopment to the North-West of the site with one unit being a Changing Places & Accessible toilet facility and the other a Male & Female toilet facility. Both toilets are single storey and circular in design, clad with vertical cedar cladding with an overhanging circular flat roof. The Male and Female toilet block

features a glazed polycarbonate roof and the Changing Places block would use a sedum covering with roof lanterns providing natural light.

The structures, whilst contemporary in their aesthetic, are considered compatible to their surroundings in terms of scale and materials. Conservation and Design Officers consider the structures would also have a stylish simplicity which is what one would expect within a park. The materials palette in time, would also have a recessive quality and would be compatible and respectful of their historic setting. Following consultation from C&D Officers the toilet blocks were moved further into the site, enclosing them within the driveway hedge.

Entertainment Space

The concept of creating an entertainment space is considered entirely appropriate within this parkland setting. The former bandstand currently occupying the site is considered an *accessory* to the 'principal' Grade II listed North Lodge building and is not of special architectural or historic interest. The proposed entertainment space is again modern in design, with two curved walls clad with vertical cedar cladding set on a brick plinth and a canopy supported by four metal stays. Following a consultation response from Conservation and Design, the original plans for the entertainment space as submitted under PF/22/3010, were reduced in height and length an amendment which has been welcomed in order for the structure to complement the existing parkland buildings which are relatively modest and subservient in scale and do not challenge the primacy of the main listed building.

Multi-Use Area

The remaining central area of hardstanding is to remain and made good to allow it to play host to a number of flexible community uses. The applicant has provided visuals to demonstrate an example of such uses and includes outdoor exercise classes and sports, concerts and a pop-up market. Improving the appearance of the hardstanding which is currently run down would visually enhance the area and the accessibility of the site. The pop-up market is intended for occasional use, with a maximum of two pop-up markets per month akin to the number allowed under permitted development. A small amount of parking has been provided on the site to allow vendors to set up stalls and bring goods to the site. The details of how this will be managed have been provided within a Traffic Management Plan for the site.

Horticultural hub

A horticultural hub is proposed along the eastern boundary of the site for the applicants to create a community-based plant growing operation, involving local groups using the growing and nurturing of plants to aid well-being and mindfulness. The Hub is formed by a secure store, indoor potting area and bespoke greenhouse measuring approximately 10m x 6m. The store and potting area would have a sedum blanket roof whilst the greenhouse area to the front would be glazed. A screen wall extending from the building would provide further sheltered area for potting/ planting. The hub would be enclosed with 1.8 high 'V' Mesh Security fencing. Additional planting has been added along the eastern boundary of the site to soften the visual impact of the horticultural within the wider park setting. Whilst there is considered to be some heritage harm resulting from this element of the proposal and having regard to the NPPF, such harm is considered to be 'less than substantial' (given the alterations made since PF/22/3010 officers consider it has unquestionably been lessened on this spectrum) and would need to be weighed against the public benefits accruing from the scheme.

Community Shed

There are some concerns about the scale and appropriateness of the structure, which is a large timber shed measuring c.12.5 metres long with a gable width of c.8.5 metres, it would therefore be a comparatively large structure within its setting with a very functional appearance. However, the roof has been softened visually with a lightweight sedum blanket to help reduce its impact. Sedum roofs are often very heavy and would need appropriate structural support and the agent has confirmed that this lightweight version could be supported by the shed structure. Officers consider the shed would therefore be relatively well assimilated into the south-east corner amongst mature vegetation. The shed has been screened to the south and east by additional planting and therefore as with the horticultural hub, whilst there would be some heritage harm resulting from this structure, it would be at the lower end of the scale and would need to be weighed against the public benefits accruing from the scheme.

Community Food Hub

The Food hub is proposed to be a 3mx 4.8m portakabin, measuring approximately 2.6m tall. The cabin would be over-clad with vertical timber cladding and a sedum roof to match the other structures on the site. It would be located within the south-west corner of the site and would be used as a food bank for local people to collect food from. Whilst the portakabin would be utilitarian in appearance, the timber cladding would soften over time to give it a more recessive appearance as it silvers and the sedum roof would assimilate well with the other structures proposed and nature of the park.

Summary

Whilst the amendments made to the scheme have been positive and have reduced the impact of several elements within the park, there is still a comparatively high concentration of structures proposed. It is apparent therefore that some level of harm would still be caused to the appearance and character of the park, and thus to the overall setting of the Grade II listed North Lodge Building, and to the overall significance of the Cromer Conservation Area.

In terms of quantifying the level of this harm, it must still be considered 'less than substantial' for NPPF purposes and Conservation and Design Officers consider that it has unquestionably been reduced on this spectrum following revisions. However, great weight must still be given to the conservation of heritage assets and the harm identified will need to be weighed in the planning balance against public benefits.

3. Landscape and Visual Impacts

The Park is a valued green space within the town and is designated as Open Land Area within the Local Plan. Policy CT 1 Open Space Designations states that 'development will not be permitted on Open Land Areas except where it enhances the open character or recreational use of the land'. Officers consider that whilst the proposal would not enhance the parks open character it would facilitate a number of recreational uses for the community on an underutilised part of the park. Therefore it is considered that enhancing the usability of this neglected area of the park for recreational purposes would comply with this policy requirement.

In terms of Landscaping and wider visual impacts of the scheme, the hard landscaping would remain the same, with the current surfacing made good where disturbed and jet washed. The

applicant has stated that when further funding becomes available, a new porous surface to replace the existing would be laid. The details of which can be controlled by condition. Landscape officer consider that the proposed structures with sedum rooves and timber cladding as proposed, will be relatively well assimilated into the park amongst the mature vegetation.

In terms of soft landscaping, additional boundary planting is proposed along Overstrand Road and the site plan shows a central circular planting bed and beds surrounding the entertainment area to be maintained by the Friends of North Lodge Park. Officers consider enhanced landscape planting in the form of semi-mature trees with under-planting along the south site boundary with Overstrand Road is appropriate and would help deliver biodiversity net gains within the park. A condition requesting details of hard and soft landscaping proposals and controlling external lighting would be appended to any subsequent approval.

Therefore given the enhanced recreational use of the land, the appropriate use of materials and subject to securing further details of the proposed planting scheme, the proposal is considered to comply with policies EN 2, EN 4 and CT 1 of the Adopted Core Strategy.

4. Residential Amenity

Core Strategy Policy EN 4 supports development proposals where they would not have a significantly detrimental impact upon the residential amenity of nearby occupiers. There are several private properties within the park and a number along Overstrand Road who overlook the Park.

Policy EN 5 requires that within areas designated as Public Realm proposals will be expected to enhance the overall appearance and usability of the area, the proposed alterations and improvements including the provision of accessible Public toilets are considered to have both public and operational benefits by increasing the sites usability and enhancing the facilities available.

Given the intended uses, the frequency of use and the hours of operation there is not considered to be any significant detrimental impact in terms of noise, lighting, overlooking or overbearing.

As such, it is considered that subject to the proposed conditions, the proposed development would broadly comply with the requirements of Policies EN 4, EN 5 and EN 13 of the adopted North Norfolk Core Strategy in respect of protecting residential amenity.

5. Highway Safety

Highways access to the site would be via Carriage Drive from Overstrand Road with vehicular access to the site controlled with 1.2m high five bar lockable gates. Seven Parking spaces are shown on the site plan which are intended to be used for occasional pop-up markets to be held in the multi-use area. The Traffic management Plan submitted states the parking would not be for general use and would only be available to stall holders when setting up and vehicles would have to remain until the event has finished. Vehicular access will be restricted to arrival before 8.00 am, and leave after 4.00pm (depending on the duration of market) where vendors

will be encouraged to arrive and depart within a limited time slot of 30 minutes and vehicle movements during these times are proposed to be marshalled.

As first presented under the previous application (PF/22/3010), Highways officers were concerned that the proposed uses would engender an increased use of the narrow gated access to 'Carriage Drive' which has restricted width, a very tight turning radii and it would be shared with pedestrians who regularly and predominantly use this route.

However, this scheme proposes to only permit a maximum vehicle size on the site for the pop up markets, which are proposed at a scale and frequency which could fall under permitted development. Traffic movements would also be limited under the terms of the submitted Traffic Management Plan, permitting only relevant vehicles at specified times and marshalling the access on entry, exit and parking. Highways Officers consider that this would significantly reduce any potential impacts subject to adequate management.

Officers consider that the proposal accords with the aims of Core Strategy Policies CT 5 and CT 6.

Conclusion and Planning Balance

Harm has been identified in terms of impact on the setting of heritage assets (North Lodge) and the Cromer Conservation area given the concentration and appearance of structures within the Parkland setting. However, there are a number of public benefits associated with the proposal including:

- the revitalisation and improvements to a currently unused area of the park in order to promote and facilitate new recreational uses as well as provide new public toilets; and
- a number of flexible community uses, some of which would support the local economy, all of which would help ensure the future viability of the park.

Having regard to these benefits and affording the heritage harm identified great weight; it is considered that the public benefits associated with the proposals would outweigh the identified harm to the heritage assets. Consequently, the proposals would be compliant with paragraph 202 of the NPPF, which deals with less than substantial harm to heritage assets.

In all other respects, subject to conditions, the development is considered to accord with the relevant policies of the adopted Development Plan as listed above. No consultees have raised objections to the proposals.

The issues raised in letters of representation received (summarised above) following publicity and consultation carried out in accordance with the requirements of the Town and Country Planning (Development Management Procedure) (England) Order 2015 (as amended), have been considered. They do not raise material considerations which outweigh the recommendation to approve.

RECOMMENDATION:

APPROVAL subject to conditions to cover the matters listed below (and any others subsequently considered necessary by the Assistant Director – Planning):

1. The development hereby permitted shall begin no later than 3 years from the date of this decision.

Reason for the condition

As required to be imposed by Section 91 of the Town and Country Planning Act 1990 as amended by Section 51 of the Planning and Compulsory Purchase Act 2004.

2. The development hereby permitted shall be carried out in accordance with the approved plans and documents, except as may be required by specific condition(s) and as listed below:

Drawing Number 'EX01', entitled 'Existing Plans & Elevations', received on 15/08/23

Drawing Number 'PL01 H', entitled 'Proposed Site Plan & Elevations', received on 15/08/23

Drawing Number 'PL02', entitled 'Proposed Plans & Elevations to W.C's', received on 15/08/23

Drawing Number 'PL03 D', entitled 'Proposed Plans & Elevations to Entertainment Area & Horticultural Hub', received on 15/08/23

Drawing Number 'PL04 B', entitled '3D Visuals', received on 15/08/23

Traffic Management Plan, received on 15/08/23

Design, Access & Heritage Statement (Revision B), received on 15/08/23

Reason for condition

To ensure the development is carried out in accordance with the expressed intentions of the applicant and to ensure the satisfactory development of the site, in accordance with Policies EN 2, EN 4 and EN 8 of the adopted North Norfolk Core Strategy

3. The materials to be used on the external surfaces of the development hereby permitted shall be constructed in accordance with the details submitted in the application.

Reason for condition

To ensure the satisfactory appearance of the development in accordance with Policy EN 4 of the adopted North Norfolk Core Strategy.

4. Prior to replacement of the hardstanding details shall be submitted to and approved in writing by the Local Planning Authority. The hardstanding shall be installed and retained thereafter in accordance with the approved details.

Reason for condition

To ensure the satisfactory appearance of the development in accordance with Policy EN 4 of the adopted North Norfolk Core Strategy.

5. Prior to the installation of any external lighting, details shall be submitted to and approved in writing by the Local Planning Authority. The lighting shall thereafter be installed in accordance with the approved details.

Reason for condition

To ensure that the development minimises light pollution and reduces glare, in the interests of highway safety, and to minimise the potential impact on biodiversity in accordance with Chapters 12 and 15 of the National Planning Policy Framework, and Policies EN 2, EN 9, EN 13 of the adopted North Norfolk Core Strategy.

6. The pop-up market use proposed shall only be held a maximum of twice per month in any given calendar year and shall only be open to members of the public between the hours of 07:30 and 17:00.

Reason for condition

In the interests of Highway Safety and residential amenity in accordance with Policies CT 5, EN 4 and EN 13 of the adopted North Norfolk Core Strategy.

7. The means of vehicular access to and egress from the development hereby permitted shall be carried out in accordance with the Traffic Management Plan received on 15/08/23.

Reason for condition

In the interests of highway safety and traffic movement in accordance with Policy CT 5 of the adopted North Norfolk Core Strategy.

8. No development shall commence until a scheme for hard and soft landscape proposals has been submitted to and approved in writing by the Local Planning Authority.

The proposals shall include plans at no less than 1:200 showing the following details:

Proposed Soft Landscape Details

- a) existing trees, shrubs and hedgerows on the site, indicating those to be removed
- b) accurate plotting of those to be retained (including species and canopy spread), including measures for protection during the course of the development to BS5837:2012
- c) Details of all new planting including: species, location, number and size of new trees and shrubs
- d) Measures for protection of new planting

Proposed Hard Landscape Details

- e) Surface materials for vehicle and pedestrian areas
- f) Boundary treatments, including fencing, walling, etc

Implementation and Retention

- g) An implementation programme laying out a timescale for the completion of all landscape works
- h) A landscape management plan, stating management responsibilities and a schedule of retention and monitoring operations for all landscaped areas for a minimum of five ten years following implementation.

Reason for condition

To protect and enhance the visual amenities of the area, in accordance with the requirements of Policy EN 4 of the adopted North Norfolk Core Strategy.

8. No development shall commence until a Tree Protection Plan and Arboricultural Method Statement have been submitted to and approved in writing by the Local Planning Authority. The development shall then be carried out in strict accordance with the approved details.

Reason for condition

To protect and enhance the visual amenities of the area, in accordance with the requirements of Policy EN 4 of the adopted North Norfolk Core Strategy.

9. No removal of hedgerows, trees or shrubs, or works to, or demolition of, buildings or structures that may contain breeding birds shall take place on or between the 1st March to 31st August, inclusive, in any calendar year unless an absence of nests is confirmed following a pre-commencement check by a suitably qualified ecologist.

Reason for the condition

In accordance with the requirements of paragraphs 174 & 175 of the National Planning Policy Framework (September 2023), Policy EN 9 of the adopted North Norfolk Core Strategy and for the undertaking of the council's statutory function under the Natural Environment and Rural Communities Act (2006).

10. Prior to demolition of the existing bandstand the soffits shall be removed by hand.

Reason for the condition

In accordance with the requirements of Policy EN 9 of the adopted North Norfolk Core Strategy in order to safeguard protected species.

Final wording of conditions to be delegated to the Assistant Director – Planning
